

EYE AND FACE PROTECTION

WELDING SHIELD

CERTYFIKAT
CIOP - PIB

PRODUCT FEATURES

MATERIAL: rigid pressboard. Designed for protecting welder's eyes and face from intense visible light, hazardous ultraviolet and infrared radiation of the electric arc, as well as from the spatter of melt metal and slag during the welding process. Recommended especially for works in places difficult to reach. In the standard equipped with replaceable protective pane and welding filter with the dimming rate of 10 DIN. Extra lightweight. Easily replaced filter and protective pane thanks to the plastic frame they are installed in. **STANDARD:** EN 175.
