

LEG PROTECTION

GEL INSOLES

PRODUCT FEATURES

MATERIAL: TPE/polyester knit. Made of gel of different density, which relieves the feet in different ways (soft and flexible blue gel - relieves the pressure of the foot on the ground, orange - acts as a shock absorber to which the foot is exposed during contact with the ground and gray - stabilizes the heel by keeping it in the right position and supports the longitudinal arch of the foot, relieving it). The design of the insoles reduces foot fatigue and increases comfort while walking. Thanks to perforation and a breathable layer of fabric, the insoles provide air circulation inside the footwear. The insoles have embossed lines for self-cutting according to the required size. Perfect for people who lead an active lifestyle or work in a standing position.
